Strydo Technologies Pvt Ltd

About Us

Strydo Industries incorporated in 2012, in Vellore, Tamil Nadu is a resource for locating the best people to help you reach your learning goals. We provide IT training, Research & Development projects, Internship, Web development, Placement assistance, Academic projects, Faculty Development program, and Technical workshops.

We enhance individuals through efficient training methodologies to have a better scope and ideas for their future. It is always important to set us S.M.A.R.T goals to achieve our long term vision and most of us are left helpless in those situations. Our experienced professionals teach you the S(specific),M(Measurable),A(Accurate). R(Reliable), T(Timely) way of approaching your goals.

We believe that when it comes to training, you need to develop true competence in new skills, not just receive an overview of ways and techniques. The best way to assure competence is through facilitated hands on practice. Our students spend at most of their time in class performing structured hands on lab exercises that build competence, confidence, and clarity.

We have professionals with great experience to train an individual bring out their best in areas of innovation, creativity and efficiency. We have served thousands of clients for the past years with great results.

OUR MISSION

Strydo Technologies is an industrial skill provider for students, Faculty and IT professionals. We provide IT training, Research & Development projects, Internship, Web development, Placement assistance, Academic projects, Faculty Development program, and Technical workshops.

Our sole purpose is to create easy ways for skill development and to understand one's desires and help them out in training and guiding them to reach their goal.

Our team's expedition is to help a professional or an individual to work or learn on developing their skill sets and to understand their strength to explore great ways of opportunities and to make them comfortable with their options and ideas.

We are crystal clear about our mission!! Are you? If so join us to have an endearing journey to find the better you!

OUR VISION

Strydo Technologies' authentic purpose is to create an easy room of optimistic juncture for any thriving individual with great deal of passion and hard work.

"Opportunities are not magical, but one's effort and endurance bring them umpteen numbers of opportunities". Our vision is to multiply ways to endure those opportunities and provide world class training to students, faculty, IT professionals, etc.

Strydo's endeavor is to show more rays of hope without any impediment and to be a global leader in industrial soft skill training.

Our Vision is to grab hold of YOUR Vision for you see through it and to see the lights in your path so you can seize game!

PROJECT TRAINING

METHODOLOGIES

PROJECT - 1

- Title selection and assistance on latest technology
- Analyzing the requirements

MODULES - 2

- Project Design
- Methodology Creation

DEVELOPMENT - 3

- Software Installation
- Coding Execution

REVIEW GUIDANCE - 4

- Completed Project document support
- Per demo Section
- Final VIVA notes

INTERNSHIP - 5

- Industrial Internship Training
- Internship Certificate Based On Industries

JOB ASSISTANCE - 6

- Job Reference
- Placement Training

LORA		
S.NO	**CODE**	**TITLE**
1.	ITRO01	IoT-Enabled Distributed Smart Farming System using Lora
2.	ITRO02	Lora Integrated System for Real-Time Accident Detection, Notification, and Emergency Response in Remote Terrain
3.	ITRO03	Smart Wearable Defense System with Two-Way LoRa Communication for Health Monitoring and Emergency Response
4.	ITRO04	Energy Harvesting on AC Power Lines for a Battery-Free LoRa Sensor Node
5.	ITRO05	Real-Time Bridge Collapse Detection and Alert System Using Multi-Sensor Fusion and IoT Communication
6.	ITRO06	A Solar-Powered LoRa Water-Level Monitoring Node Using a To
7.	ITRO07	LoRa-Based Soil Nutrition Monitoring by Peer-to-Peer and Mesh Wireless Network
8.	ITRO08	Real-Time Worker Safety System Using Multi-Sensor LoRa Communication
9.	ITRO09	LoRa-based Wireless Load Monitoring and Control using PZEM Module
10.	ITRO10	ESP32-Based LoRa Communication for Agricultural IoT: Design, Implementation, and Field Evaluation
11.	ITRO11	IoT-LoRa Synergized Framework for Urban Sustainable Energy Solutions
12.	ITRO12	A LoRa-Based Advanced Driver Assistance System for Rural Road Safety
13.	ITRO13	Design and Implementation of Smart Power Controller for Sensor Node
14	ITRO14	Solar Powered LoRa Mesh IoT System for Real Time Forest Fire Prediction, Detection and Alerting System
15	ITRO15	IoT based Smart Agriculture with Field Situation Aware Control and Communication
16	ITRO16	Design of Industrial Motor Operation Monitoring and Fault Early Warning System
17	ITRO17	IoT - Enabled LoRa System for Real Time Leakage Current Detection in Transmission Line

18	ITRO18	LoRa-Enabled Intelligent Maritime Safety and Real-Time Fisherman Tracking System using IoT-based Alert Communication Framework
19	ITRO19	Design and Evaluation of an IoT-Enabled Sensor Network Using LoRa Technology for Environmental Monitoring
20	ITRO20	Smart Mine: Advanced Safety and Alert System for Coal Miners
21	ITRO21	Real-Time Transmission Line Monitoring and Line Cutoff Fault Detection using STM32 and LoRa Communication Protocol
22	ITRO22	Priority-Based Traffic Management System for Ambulance
23	ITRO23	LoRa-Based Long Range Communication System for Rural and Disaster Affected Areas
24	ITRO24	A LoRa Based Vehicle Anti-Theft System with Real Time License Plate Verification
25	ITRO25	Edge AI Based Wildlife Detection and Monitoring System Using YOLOv5n and LoRa Communication
26	ITRO26	Design of a Bluetooth - LoRa Hybrid Communication System for Remote Areas
27	ITRO27	Design and Evaluation of an IoT-Enabled Sensor Network Using LoRa Technology for Environmental Monitoring
28	ITRO28	IoT-Enabled Distributed Smart Farming System using Lora
29	ITRO29	A LoRa-Oriented Communication Approach for Reliable Data Transfer in Micro Smart Grid-Supported Groundwater Monitoring Stations

BIO MEDICAL

S.NO	CODE	TITLE
1.	ITBIO01	Design and Implementation of a Smart IoT-Based Biomedical Waste Segregation, Sanitization, and Monitoring System Using ESP32
2.	ITBIO02	Fuzzy IoT Temperature Regulated Storage System with Consumer-Oriented Dashboard
3.	ITBIO03	A Hybrid IoT and Cloud Intelligence Model for Continuous Patient Monitoring
4.	ITBIO04	IoT Based Smart Bed System for Real Time Health Monitoring
5.	ITBIO05	AI Based Health Monitoring System using IoT and Wearable Device
6.	ITBIO06	Anomaly Detection using Isolation Forest in IoT-Based Patient Health Monitoring Systems
7.	ITBIO07	Guardian Angel - A Real Time Emotion-Aware Monitoring System
8.	ITBIO08	BioMedical Waste Segregation and Disposal System
9.	ITBIO09	Health Risk Assessment in Smart Elderly Care Using Multimodal Data Fusion
10.	ITBIO10	Smart Care Device Using IoT for Rural Health Monitoring
11.	ITBIO11	IoT-LoRa Synergized Framework for Urban Sustainable Energy Solutions
12.	ITBIO12	Design and Implementation of an IoT-Cloud Framework for Patient Health Analytics
13.	ITBIO13	Smart IoT Health Monitoring Device with Integrated Women Safety Alert System
